Paragraph 1 - Measurement of aggregate risk for retail investment funds in relation to financial contracts

Sub-paragraph 2 - Commitment approach

## General regulation of the AMF

### Article 422-54 into force since 21 December 2013

DISCLAIMER : Information boxes have been inserted within the General Regulation. They allow for a direct access to the relevant European regulations on the subject matter.

The user will be redirected to the European regulations as initially published in the Official Journal of the European Union and to the subsequent corrigenda, if any. The AMF does not guarantee the completeness of the redirections to these European regulations and corrigenda.

The boxes are located at the most relevant level of the GRAMF depending on the provision of the EU regulations to which they refer (Book, Title, Chapter, Section, etc.).

This additional material is provided for information purposes only and does not constitute a regulatory instrument. The AMF shall not be held liable or responsible for any harm resulting directly or indirectly from the provision or the use of these information boxes.

#### Article 422-54

I.- The asset management company may take into account netting and hedging arrangements provided that these arrangements do not ignore obvious and material risks and that they result in a clear reduction in risk.

II. - 1° Netting arrangement consist of a combination of positions on financial contracts or securities for the same underlying asset irrespective of their maturity dates, whose sole purpose is to eliminate the risks relating to certain positions taken through other financial contracts or securities.

2° Hedging arrangements consist of a combination of positions on financial contracts and/or financial securities for which:

a) The underlying assets are not necessarily identical

2023-10-10

b) The positions are concluded with the sole purpose of offsetting the risks relating to positions taken through other financial contracts or securities.

3° Any retail investment fund which has principally concluded financial contracts relating to interest rates may use specific duration netting rules, for which the relevant procedures are specified in an AMF instruction, in order to take into account correlations between instruments with differing maturities along the interest rate curve. Specific duration netting rules may not be used if they lead to an incorrect valuation of the risk profile of the retail investment fund.

A retail investment fund which uses specific duration netting rules for its financial contracts relating to interest rates may take hedging arrangements into consideration. However, only financial contracts relating to interest rates that have not been taken into account in any hedging arrangement may use these specific netting rules.
