

Book IV - Collective investment products

Title II - AIFS

Chapter II - Funds open to retail investors

Section 1 - Retail investment funds

Sub-section 4 - Calculation of aggregate risk

Paragraph 1 - Measurement of aggregate risk for retail investment funds in relation to financial contracts

Sub-paragraph 2 - Commitment approach

General regulation of the AMF

Article 422-55 into force since 21 December 2013

DISCLAIMER : Information boxes have been inserted within the General Regulation. They allow for a direct access to the relevant European regulations on the subject matter.

The user will be redirected to the European regulations as initially published in the Official Journal of the European Union and to the subsequent corrigenda, if any. The AMF does not guarantee the completeness of the redirections to these European regulations and corrigenda.

The boxes are located at the most relevant level of the GRAMF depending on the provision of the EU regulations to which they refer (Book, Title, Chapter, Section, etc.).

This additional material is provided for information purposes only and does not constitute a regulatory instrument. The AMF shall not be held liable or responsible for any harm resulting directly or indirectly from the provision or the use of these information boxes.

Article 422-55

I. - If the use of financial contracts does not create any additional exposure for the retail investment fund, it is not necessary to include the underlying exposure in the commitment calculation if it fulfils the following criteria:

- 1 • Its purpose is to swap the performance of all or part of the retail investment fund asset with the performance of other reference financial instruments;
- 2 • It completely eliminates market risk for the swapped assets. Performance of the retail investment fund no longer depends on the performance of the assets that are the subject of the swap;
- 3 • It does not include any additional optional component, any leverage or any other additional risk relating to any direct investment in the reference assets.

2023-10-10

II. - A financial contract shall not be taken into account in calculation of aggregate risk using the commitment approach if it fulfils the following criteria:

a) Combination of the financial contract and a cash sum invested in assets yielding the risk-free rate of interest offers equivalent exposure to that obtained by a direct investment in the underlying asset;

b) It does not generate any additional exposure or leverage, and does not add any market risk.

III. - If the commitment approach is used, the calculation of aggregate risk need not include any temporary cash borrowing agreements concluded on behalf of the retail investment fund pursuant to Article R. 214-32-40 of the Monetary and Financial Code.
