## **Setting up redemption gates mechanisms: the AMF publishes a new instruction and adjusts its existing policy**

**In addition to the amendments to its General Regulation, the Autorité des marchés financiers (AMF) is issuing a new instruction (DOC-2017-05) and adapts its policy to incorporate the terms and conditions for setting up redemption gates mechanisms in open ended funds.**

The "Sapin 2" law and the AMF General Regulation allow UCITS, retail investment fund (FIVGs), private equity funds (FCPR, FCPI and FIP), professional private equity funds and employee investment schemes to provide for the possibility to cap redemptions temporarily, in case of exceptional circumstances and to protect the interests of the unit holders.

To clarify the practical arrangements for setting up these gating mechanisms in open ended funds, the AMF is issuing a new instruction, referenced as DOC-2017-05.

Existing amended policy documents are, in particular, instructions on procedures for approving or declaring the various investment funds concerned by these new redemption gates, as well as the standard prospectuses, rules and articles of association of UCITS and AIFs which constitute the annexes of these instructions. These policy documents are listed in the table below:
