Financial market

The AMF regulates financial market infrastructure and intermediaries and examines transactions for any abnormal events or conduct.

Your tasks

- Assist and monitor market intermediaries and own-account operators (monitoring compliance with regulations, identification of problems, targeting of controls), market and post-trade infrastructure (approval and monitoring);
- Detect market abuse (targeting of investigations) or professional breaches (inspection proposal);
- Carry out strategic intelligence of market trends;
- Contribute to defining market regulation policy.

Your scope of intervention

Market intermediaries (brokers, investment banks, etc.), market and post-trade infrastructure (the various markets under the AMF's jurisdiction (equity, bond, derivative).

Your profile

Quantitative profile, ideally with intermediation, management or financial analysis experience
