Scientific Advisory Board Review n°1 - September 2014

The Autorité des marchés financiers (AMF) launches the first edition of its Advisory Scientific Board's Review, a new publication aimed at releasing original research papers from experts coming from various professional sectors and proposing a valuable contribution on either financial markets regulation, investors protection or financial stability. Unique, diverse and pedagogical, these articles underline the willingness of the AMF to make academic research better-known and to promote debates on current issues that are crucial from the regulator's point of view, both on the Paris financial Center and abroad, by encouraging discussions that reinforce the quality of such a regulation.
