## IT, Data and Security profiles

The AMF explores the opportunities offered by new technologies for carrying out its duties and anticipates possible changes to the ways of supervising financial players.

### Our tasks

- Proposing and implementing solutions that correspond to business needs
- Ensuring the unity, consistency and security of information systems
- Deploying and maintaining information systems in operational condition at the appropriate level of service
- Taking part in projects as part of the AMF's digital transformation
- Taking part in experimental projects in artificial intelligence, for example.
