## AMF Savings and Investment Barometer - 2022

The AMF Barometer asks the French about their preferences and perceptions in terms of investments, particularly with regard to equity investments. This 6<sup>th</sup> edition of the survey, which covers a sample of 2,000 people aged 18 and over interviewed from September 20 to October 10, 2022, highlights a decline in equity investment intentions, in a more uncertain economic context. It also presents a segmentation of savers according to the type of investment products held.
